Broaden Your Knowledge with Salesforce CRT-403 Sample Questions:

Question: 1

Universal Containers has limited in-house development resources, but would like to support online payment processing for its products. What is the recommended solution to meet this requirement?

a) Configure pricebooks, products, and payment schedules to enable this capability.
b) Work with developers to develop custom code for payment processing.
c) Configure Outbound Messaging to send a message to an external Payment Gateway.
d) Install an AppExchange product to provide Payment Gateway processing.

Answer: d

Question: 2

What is a use case in which an app builder would choose to use object-specific actions instead of global actions in the Salesforce mobile application?

(Choose 3)

a) A user wants to add "log a call" actions to specific objects
b) A user wants to create new object records with no relationship to other records
c) A user wants to create new new object records that automatically associate with related records
d) A user wants to send emails from the cases object
e) A user wants to add "log a call" actions to global layouts

Answer: a, c, d

Question: 3

Universal Container's app builder needs to display an account's rating on all contacts related to that account. Which formula is valid in a text formula field on the contact to display the appropriate value?

(Choose two answers)

a) CASE(Account.Rating, Hot, Hot, Warm, Warm, Cold, Cold, Not Rated)
b) CASE(Account.Rating, "Hot", "Hot", "Warm", "Warm,", "Cold", "Cold", "Not Rated")
c) Account.Rating
d) Text(Account.Rating)

Answer: b, d

Question: 4

Cloud Kicks (CK) tracks the support level of its customers on the account record page. CK wants to show a text notification on a case record page when the related account is a platinum-level customer.

How could an app builder meet this requirement?

a) Clone the Case Lightning page > Add a rich text area to the new page, and assign this page to platinum accounts.
b) Create a text-only Visualforce page > Drag the Visualforce component into the Case page layout > Set its visibility to show when the account support level is platinum.
c) Create a text-only Visualforce page > Clone the case page layout > Drag the Visualforce component into the page, and assign the layout to platinum cases.
d) Add a rich text area to the Case Lighting page > Set the component visibility of the rich text area to show when the account support level is platinum.

Answer: c

Question: 5

Universal Containers needs to create a roll-up summary field on a custom object that counts the number of related records on another custom object.

What type of field must exist before the roll-up summary can be created, and where should it be located?

a) A lookup relationship field on the parent object
b) A lookup relationship field on the child object
c) A master-detail relationship field on the parent object
d) A master-detail relationship field on the child object

Answer: d

Question: 6

In what situation should the data import wizard be used in Salesforce?

(Choose 2)

a) A user needs to import fewer than 50,000 records
b) A user needs to import records only, not export
c) A user needs to import and export records
d) A user needs to import more than one million records

Answer: a, b

Question: 7

When editing a page layout, what field properties can be applied?

(Choose 2)

a) Edit-Only
b) Read-Only
c) Required
d) Universally Required

Answer: b, c

Question: 8

Universal Containers needs to set the record type for a converted lead's Account, Contact, and Opportunity based on the user who is converting the lead. How can this be accomplished?

a) Set the default record types for each Profile for Account, Contact, and Opportunity to the desired record type for converted records.
b) Set the default record types for each Role for Account, Contact, and Opportunity to the desired record type for converted records.
c) Set the master record types for each Profile for Account, Contact, and Opportunity to the desired record type for converted records.
d) Set the master record types for each Role for Account, Contact, and Opportunity to the desired record type for converted records.

Answer: a

Question: 9

Which of the following statements is not true about the behavior of workflow rules when the re-evaluation of workflow rules is set in the Lightning Platform?

(Select one)

a) Up to five fields can be updated after the initial field update.
b) Up to five workflow triggers can occur after the initial field update.
c) The limit for workflow time triggers per hour may be exceeded.
d) Multiple workflow rules can be re-evaluated.

Answer: a
